

LEAD WASTEWATER UTILITY WORKER

Job Status: Non-Exempt
Date Adopted:
Date Modified: 03-16-2023

Safety Sensitive Position

Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are not intended to reflect all duties performed within the job.

DEFINITION

Under supervision, performs a variety of semi-skilled and skilled duties in the wastewater collection system cleaning and obstacle-clearing work; participates in construction, maintenance, service, and repair of wastewater collection systems; assists in maintenance tasks associated with the water distribution system; and performs a variety of tasks relative to assigned area of responsibility.

DISTINGUISHING CHARACTERISTICS

The Lead Wastewater Utility Worker is an advanced journey working level classification. At this level, incumbents perform the most complex and specialized tasks while exercising broader discretion and independent judgment within established guidelines.

SUPERVISION RECEIVED AND EXERCISED

Direct supervision is received from the Operations Supervisor (Wastewater Utility) and/or Operations Manager (Construction & Maintenance)

Technical and functional work direction may occasionally be provided to Wastewater Utility Worker I/II by the Lead Wastewater Utility Worker.

ESSENTIAL AND MARGINAL FUNCTION STATEMENTS

Essential and other important responsibilities and duties may include, but are not limited to, the following:

Essential Functions:

1. On a geographic and pre-scheduled basis, performs routine maintenance and cleaning of sewer collection lines using Jet-Rodder/Vactor machines; runs hose-up collection line; operates water pressure controls; and ensures debris is removed from sewer lines.
2. Inspects sewer lines before and after cleaning; attaches video equipment to reel and inserts into the manhole and collection lines; views surveillance videos from inside video van and assesses the interior condition of lines.
3. Operates construction equipment in connection with the maintenance of sewer collection facilities, including dump truck, front-end loader, and backhoe; uses a jackhammer to break up cement.
4. Wears Self Contained Breathing Apparatus and climbs into manholes to inspect conditions and dislodge objects from sewer lines; performs sewer system repairs, including for laterals and sewer mains.

Lead Wastewater Utility Worker

Essential Functions (continued):

5. Raises and repairs sewer manholes and hydrants and performs cement repair and patchwork at job sites.
6. Maintains accurate records and logs of work performed, including those obtained using video surveillance equipment.
7. Utilizes hand and power tools as applicable to the work.
8. Performs all work in accordance with established safety policies and procedures, including OSHA regulations relating to confined space entry and working around dangerous gases.
9. May assist in orienting or training new personnel; makes recommendations on improvements to job procedures.
10. District employees are expected to work overtime, weekends, evenings, and holidays as required to accommodate the District's needs, in addition to responding as a Disaster Emergency Service Worker.
11. Regular attendance at the work site.

Marginal Functions:

1. May perform related water distribution system maintenance duties during regular working hours or after-hour call-outs.
2. Performs related duties and responsibilities as required.
