

LEAD WATER SYSTEM OPERATOR

Job Status: Non-Exempt
Date Adopted: 01-2015
Date Modified: 03-16-2023

Safety Sensitive Position

Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are not intended to reflect all duties performed within the job.

DEFINITION

Under supervision, performs a wide variety of semi-skilled and skilled duties involving the installation, construction, maintenance, and repair associated booster pumps, pumping stations, reservoirs, and domestic water wells; performs preventative and predictive maintenance on assigned equipment; removes, disassembles, cleans reinstalls and performs repair of pump/motor assemblies, equipment, and components; assists in the diagnosis and performance analysis of water wells and booster stations.

DISTINGUISHING CHARACTERISTICS

The Lead Water System Operator is an advanced lead level in the Water System Operator series. At this level, incumbents perform the most complex and specialized tasks while exercising broader discretion and independent judgment within established guidelines.

SUPERVISION RECEIVED AND EXERCISED

Direct supervision is received from the Operations Supervisor (Production) and/or the Operations Manager (Production).

Technical or functional work direction may occasionally be provided to the Water System Operator I/II by the Lead Water System Operator.

ESSENTIAL AND MARGINAL FUNCTION STATEMENTS

Essential and other important responsibilities and duties may include, but are not limited to, the following:

Essential Functions:

1. Drives from site to site and makes daily rounds of wells, booster stations, reservoir, and water storage locations; monitors safety and security of sites and reports or corrects illegal use of water.
2. Inspects pumps, motors, and other equipment; fills salt storage containers and well oilers; calculates pump run times and pumping rates and enters data into a computer.
3. Removes and replaces chlorine cylinders and maintains records of chlorine consumption; reads and interprets various chart recorders, gauges, and water meters; makes associated arithmetic calculations and records results.
4. Performs preventive maintenance of pumps, motors, regulators, chlorine analyzers, turbidity analyzers, valves, and water meters; repair and replace various defective or worn parts and equipment as needed.

Lead Water System Operator

Essential Functions (continued):

5. Inspect, adjust, and does preventive maintenance on electrical and telemetry equipment at sites; checks connections and measures equipment output.
6. Essential Functions (continued):
7. Collects grab samples at remote sites; performs various types of field water testing, including chlorine residual; adjusts chemical dosage accordingly.
8. Reviews source results and calculates blending for Nitrate, DBCP, and other constituents in the water as needed to comply with state and federal water quality standards.
9. Operates a 10-ton crane to pick up and replace industrial motors; operates other construction equipment and/or hand and power tools needed for the work.
10. Performs miscellaneous maintenance tasks periodically, such as removing weeds and debris, repairing dirt roads, and painting motors, pump lines, and other equipment.
11. District employees are expected to work overtime, weekends, evenings, and holidays as required to accommodate the District's needs, in addition to responding as a Disaster Emergency Service Worker.
12. Regular attendance at the work site.

Marginal Functions:

- I. Performs related duties and responsibilities as required.

KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of:

Operation and maintenance of water pumping and distribution systems.
Mechanical and electrical maintenance principles and practices.
Basic chemistry, electricity, and hydraulics.
Water quality monitoring and sampling techniques and methods.
Pertinent laws, codes, and regulations.

Skill in:

Operating a personal computer and related software.
Using hand and power tools.
Operating various pieces of commercial construction equipment.

Ability to:

Operate pumps, motors, and other water storage and distribution facilities and equipment.
Calculate water flow and reservoir capacity.
Evaluate operational changes such as pressure fluctuations, system demands, and production capacities.

Lead Water System Operator

Ability to (continued):

Troubleshoot operational deficiencies of mechanical equipment.

Read gauges and meters and correct record results.

Work independently without direct supervision.

Understand and carry out oral and written instructions.

Communicate clearly and concisely, both orally and in writing.

Establish and maintain cooperative working relationships with those contacted in the course of work.

Maintain physical condition appropriate to the performance of assigned duties and responsibilities.

Maintain mental capacity, which allows the capability of making sound decisions and demonstrating intellectual capabilities.

Maintain effective audio-visual discrimination and perception needed for making observations, communicating with others, reading, writing, and operating assigned equipment.

REQUIRED QUALIFICATIONS

Any combination of experience and training that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge, skills, and abilities would be:

Job Title	Lead Water System Operator
Experience	<ul style="list-style-type: none">• Four (4) years of progressive experience maintaining and operating District facilities, systems, assets, and/or infrastructure.
Education/Training	<ul style="list-style-type: none">• Equivalent to a High School Diploma.
Required License/Certification	<ul style="list-style-type: none">• Possession of a valid D4.• Possession of a valid T2.
Desirable Degree/License/Certification	<ul style="list-style-type: none">• Valid D5.• Valid T3.
DMV Class	<ul style="list-style-type: none">• Possession of a valid California Class A Commercial driver's license with a Hazardous Materials endorsement and a satisfactory driving record.

PHYSICAL DEMANDS AND WORKING ENVIRONMENT

The physical demands and working environment demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this class. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential job functions.

Environment:

While performing the job duties, the employee frequently works in extreme outside weather conditions, in or near road traffic, near moving mechanical parts, and in high or precarious places. The employee is frequently exposed to wet and/or humid conditions, vibration, fumes, airborne particles, toxic or caustic chemicals, and the risk of electrical shock. The noise level is frequently loud.

Physical:

While performing the duties of this class, the employee is regularly required to walk; talk or hear in person; sit; climb or balance; stoop, kneel, crouch or crawl; smell; use hands to finger, handle, feel or operate objects, tools or controls; and reach with hands or arms. Employees are frequently required to stand. Employees regularly lift and/or move up to 50 pounds and frequently up to 100 pounds.

Lead Water System Operator

Mental:

While performing the duties of this class, the employee is regularly required to use oral and written communications skills; read documents or instructions; analyze and solve problems; observe and interpret data or information; use math and mathematical reasoning; learn and apply new information or skills; interact with District staff, other organizations, and customers who may be upset or dissatisfied.

Vision:

Specific vision abilities required by this job include close vision, distance vision, color vision, depth perception, and the ability to adjust focus.

Hearing:

Hear in the normal audio range with or without correction.
