

FOOD SERVICE ESTABLISHMENT SEWER DISCHARGE PERMIT APPLICATION

Under Section 6.12.010D of CVWD's Municipal Code, all Food Service Establishments (FSEs) are required to submit a complete FSE Sewer Discharge Permit Application to the District for review and evaluation. The information included in the application in conjunction with information obtained from a site inspection will be used to determine if the FSE will require a FSE Permit from the District to discharge wastewater into the District's wastewater collection system. Requirements of the FSE Permit will vary among FSEs, but, in general, each permit will require the FSE to meet the requirements for installation of Fats, Oils and Grease (FOG) removal and monitoring devices, comply with applicable District policies, and pay all required fees as set by the permit fee schedule.

FACILITY AND CONTACT INFORMATION

Facility Name

Other

EQUIPMENT

Number of automatic dishwashers: _____

Number of sink garbage grinders: _____

FRESH WATER TREATMENT

The District prohibits water softeners that are regenerated on-site with salt or brine solutions (see the CVWD Municipal Code, Section 6.08.020C). Ion Exchange water softeners that are regenerated off-site by a vendor (with no waste discharged to the sewer) are acceptable.

Is a water softener installed or planned to be installed? _____ Yes _____ No

Is the media regenerated off-site? _____ Yes _____ No

Please provide vendor's name & address (if applicable):

GREASE DISPOSAL EQUIPMENT

Grease interceptors serve to reduce the quantity of fats, oils and grease (FOG) in the wastewater before discharging into the wastewater collection system. Grease interceptors are located outside, underground and include a multi-compartment tank that function to physically separate, remove, and retain FOG and solids from wastewater discharged. For the units to be effective, they must be properly sized, constructed, and installed in a location that provides easy access for inspection and cleaning. Grease interceptors are subject to plan submission and approval by the District in accordance to all applicable District Standards and Ordinances.

Is an existing Oil & Grease Interceptor with sample box installed? _____ Yes _____ No

If yes, what size? _____

Oil & Grease Interceptor service information:

Provide name and address of pumping service:

How often is your grease interceptor pumped, (i.e., monthly, quarterly, semiannually or annually):

Copies of all oil & grease interceptor pumping records shall be maintained on site and available for District review at all times. It is the requirement of the Cucamonga Valley Water District Engineering Department, that when a grease interceptor is being pumped, the pumping service you choose shall completely pump the entire oil & grease interceptor, including the sample box, and remove and legally dispose of all material. The District shall not accept any other pumping practices.

Service Beyond Expectation
