

City of Rancho Cucamonga Parkway Restrictions

- Must follow all City codes; for any clarification contact the City's Planning department at: (909) 477-2750.
- Residents are not required to apply for any type of City permit/review to redo the parkway.
- **Allowed alternatives to turf shall consist of:**
 - Low water use planting, excluding cactus, roses and all other plants that contain sharp, pointed and thorn type plant structures. Plants shall not exceed a height of 18 inches at maturity.
 - Low water use turf alternatives (groundcovers and grasses).
 - Decomposed Granite (DG) and stabilizer installed appropriately in accordance with City Standards.
 - Wood Mulches, Barks and Chips installed appropriately in accordance with City Standards (just below the curb, to prevent migration of material to the sidewalk or street).
 - Synthetic turf installed on permeable surfaces, but not with tree root protection zone described in the installation section, provided it meets the requirements of section [17.56.050](#).
- **Prohibited parkway landscaping materials:**
 - Bare dirt without aesthetic improvements
 - Concrete and or anything impermeable, permanent, or fixed in place
 - Cobble (1 inch or larger), pea-gravel, pebbles, or rock
 - Pavers, except when used to provide a walking path from the curb to the sidewalk. A walking path within the parkway should not exceed 24 inches in width as measured from the curb.
 - Gravel (any smooth rock i.e river rock, or any textured rock less than $\frac{3}{4}$ inch in size or classified for purchase as less than $\frac{3}{4}$ inch)
 - Gravel may be used as ground cover only if it is three-quarter inch in size (i.e., crushed stone) and is not smooth (i.e., pea gravel or river rock)
 - Stones or Rocks larger than 1 inch in size or classified for purchase as 1 inch or greater.
 - Examples of permitted gravel. Many come in a variety of sizes, but be sure to order $\frac{3}{4}$ inch.
 - $\frac{3}{4}$ in. California Gold
 - $\frac{3}{4}$ in. Palm Springs Gold
 - $\frac{3}{4}$ in. Apache Brown
 - $\frac{3}{4}$ in. Apache Sunset
 - $\frac{3}{4}$ in. Barkwood

- Gravel installation – permitted gravel shall be installed just below sidewalk and curb level, using the sidewalk and curb to create a border to prevent the gravel from migrating onto streets or sidewalks. Gravel shall be installed to a minimum depth of 2 inches.

- **Parkway Tree Retention Guidelines:**

- If existing street tree is present, it must be protected at all times and properly irrigated by either microspray or drip system to ensure the life of the tree.
- If existing street tree is present it must be protected at all times prior, during and after.
- No excavation of soil from either side or around the tree, within six (6) feet from the outer edge of the trunk I----o----I.
- No cutting and removing of roots within that same six (6) feet from the outer edge of the trunk.
- Supplemental irrigation must remain or be installed in the remaining tree root protection zone, either by a microspray or drip system to ensure the life of the tree.
- Wood Mulch, Bark or Chips need to be dispersed as a cover to the tree root protection zone.

- **Overall Visible FRONT YARD Requirements**

- Max 50% Impermeable Hardscape
- Min 25% Plant Material or Artificial Turf
- Max 25% Decorative, Permeable Hardscape

Address Eligibility

Due to the City's water retention master plan, some Rancho Cucamonga Residents are not eligible to participate in CVWD's Parkway Turf Replacement Rebate Program.

If your address IS listed below, your home IS NOT eligible.

If your address is NOT listed below, your home IS eligible (must comply with all other requirements to be eligible; refer to program guidelines).

For more information contact the City's Planning Department at (909) 477-2750.
